Excerpt: . . . group using the extended hospital staff as the organizational focal point. Initially, Medicare could collect and distribute information about the practice patterns of different ACos. ultimately, that information could be used to adjust payments for differences in resource use and quality. using hospital medical staffs as ACos could better align incentives to control expenditures. the hospital could provide an organizational locus for physicians in the area to come together to monitor and influence practice styles. Although the size of the ACos would vary substantially, each of them would be much smaller than the current national pool. Individual physicians could therefore more readily see a link between their own actions and their ACo meeting its target. over time, this alternative is intended to induce physicians and other providers to practice more as a system, optimizing care delivery and reducing overall expenditures. there are significant barriers to this alternative. some argue that hospitals and physicians are competitors who will not easily collaborate with one another, making this type...
